# 1 Markdown Showcase

---

This document demonstrates the Markdown features supported by the **PDF Preview Generator**. It is designed to be both a **visual reference** and a **syntax cheat sheet**.

## 1.1 Headings

Use #, ##, or ### at the beginning of a line to define headings.

- Only # (H1) and ## (H2) are included in the Table of Contents.
- Headings are automatically numbered in the final PDF. Do **not** manually add numbers.
- Each H1 section starts on a new page.

## 1.2 Basic Text Styles

You can use the following styles:

**`**bold**`**

*`*italic*`*

``monospace``

Result:

**bold**

*italic*

monospace

# Lists

## Bullet List

- Item 1
- Item 2
- Item 3

or

- \* Item 1
- \* Item 2
- \* Item 3

Result:

- Item 1
- Item 2
- Item 3

## Numbered List

1. First
2. Second
3. Third

Result:

1. First
2. Second
3. Third

## 1.3 Blockquotes

### Standard Blockquote

Use > at the beginning of a line:

> This is a blockquote.

This is a blockquote.

## Custom "NOTE" Block

Lines that begin with > NOTE : will be rendered as a special yellow-highlighted box. Make sure the > is the **first character** on the line:

> NOTE: This is a note.

**Note:** This is a note.

## Custom "COMMENT" Block

Lines that begin with > COMMENT : will be rendered as a special blue-highlighted box:

> COMMENT: This is a comment.

**Comment:** This is a comment.

*Important:* Both NOTE and COMMENT are non standard Markdown features and are meant for the draft phase only as a means to add meta information and comments into markdown.

## 1.4 Tables

Basic tables are supported using pipes (|) and dashes (-):

Feature	Supported	Notes
Headings	Yes	Auto-numbered

Blockquotes	Yes	NOTE and COMMENT supported	
Tables	Yes	Basic markdown tables	

Feature	Supported	Notes
Headings	Yes	Auto-numbered
Blockquotes	Yes	NOTE and COMMENT supported
Tables	Yes	Basic markdown tables

## 1.5 Line Breaks & Paragraphs

A new paragraph is created by using an empty line between blocks.

To create a **manual line break**, end a line with two spaces:

Line one with break.

Line two.

Line one with break.

Line two.

## 1.6 Links

Standard Markdown links will be shown as plain text in PDF output:

[Example Link](https://example.com)

[Example Link](https://example.com)

## 2 Integration

---

The PDF Preview Tool is designed to run directly on GitHub. You do not need to install anything.

Go to the `Actions` Tab on GitHub (either the main repository or your fork) and look for a workflow with the name **Build PDF Preview**. Open it and find the PDF at the bottom of the page for download.

---

*This document was designed for use with the PDF Preview Generator. It helps verify the output structure, styles, and rendering logic.*
